## Conclusion

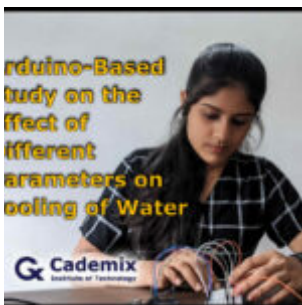

In conclusion, whether you choose to live in a big city or a small city in Germany, there are plenty of opportunities for both personal and professional growth. Almost all of the small or large companies in Germany have the highest standard of living and a high human development index, so it practically doesn't matter whether you are in a large city or small city. Especially since the beginning of the corona pandemic, there has been a trend of people moving to the suburbs or living a little bit away from city centers. One factor that is important for international people is that the concentration of immigrants is higher in larger cities than in smaller and suburban areas.

Regardless of where you choose to live, it is important to focus on having a secure job that you enjoy and that provides financial independence. With Germany's thriving economy and wide range of opportunities, there is something for everyone in this country.
